

Desert3D Hoffman Tactical Super/Basic AR Lower

45ACP/10mm

This is a version one and has undergone minimal testing. Recommended to follow all of Hoffman's original directions for printing and assembly. Although this is modified to accept different calibers, the majority of the design is unchanged. Big thanks to Hoffman for his ongoing work in the community and for making files available for us to modify. Another big thanks to Luke S for helping me work through this project and providing testing. Enjoy!
