

The Peace Release is comparable to the Battle Bar as it allows the shooter to lock and release the BCG by the use of their thumb.

PLA+ Compatible. Print entirely solid. Print in the orientation that they load in your slicer. Slots in front face allow for raw filament to be cut to size and pressed in.

Materials Needed -M3 Socket Head Bolts (Longer than 6mm, shorter than 30mm) -AR15 Antiwalk pins (Only install antiwalk plate on opposite side. Do not install plate on peace release side)
